

Ramakko's Source For Adventure | Sudbury, Ontario

PROJECT: Ramakko's Retail Location | **AREA:** Retail Space

PRODUCTS: Stonclad GS, Stontec EFC, Stonkote GS4

Ramakko's is Northern Ontario's largest retail outlet for outdoor sports equipment, located in Sudbury, Ontario. Servicing the North since 1984, what initially began as a 500 square foot retail space eventually grew to 20,000 square feet.

THE CHALLENGE:

An existing car dealership was closing due to restructuring. Ramakko's purchased the building and renovated the space to accommodate their unique needs. Several concrete block walls, from the existing office space, were removed. In addition to providing an aesthetic flooring solution, depressions from the removal of the concrete walls also had to be filled.

THE STONHARD SOLUTION:

The Stonhard team recommended a system of Stonclad GS, Stontec EFC, and Stonkote GS4 for the 7,500 square foot retail space. Stonclad GS was used to fill the depressions from the removal of the concrete block walls prior to the installation of the Stontec EFC flooring system.

Stonclad is a family of seamless, sustainable, high performance epoxy and polyurethane floor systems offering outstanding impact and abrasion resistant qualities, in addition to excellent chemical resistance. Stontec EFC is an attractive seamless flooring system, which is perfect as a cost-effective, yet decorative solution for light traffic areas. It is suitable for applications over new or existing smooth concrete substrates. Stonkote GS4 is a general service coating designed for use whenever a high solids and high gloss coating is required.
