

# STONHARD FLOOR SOLUTIONS

## Performance Mazda Ottawa, Ontario

AREA: DRIVE THRU, SERVICE DEPARTMENT

### PRODUCTS USED:

- STONSET PM5
- STONKOTE GS4

Performance Motors began business in 1965, becoming a Mazda dealership in 1975, and has been serving the Ottawa area ever since. Performance Mazda strives to be not only the dealer of choice for its customers, but also the first choice for service, parts and accessories.

### THE CHALLENGE

Performance Mazda needed an individualized flooring solution, for their Service Department and Drive Thru area, that could combine functionality with a very unique set of aesthetic requirements. The client's vision included incorporating a total of 22 logos, in 4 distinct colours, into the overall flooring design. In addition to these complex visual details, ease of maintenance and performance were also key considerations.

### THE STONHARD SOLUTION

Stonhard's ability to combine seamless, high performance flooring systems with customizable design options made this project a perfect fit. The Stonhard team recommended Stonset PM5, for patching and minor repairs, and Stonkote GS4 for both the flooring coating and logos. Stonkote GS4 is formulated to increase abrasion and chemical resistance while improving cleanability.

Once all of the detail and logo work were complete, the entire flooring surface received a final clear coat for additional protection.
